Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,4 6-9 and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Angles et al (U. S. Patent no. 6,260,835).

See figures 1,1a damper 3, locking projection 8, locking bore 9, frame closed section with lower portion 6 .

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2,3,5, 10, 11 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fielder et al in view of Hurst et al (U. S. Patent no. 6,161,822).

Angles et al is relied upon as above. Angles et al does not disclose the use of hook-shaped locking projection and locking fasteners. Hurst et al teaches the use of hook-shaped locking projections 39,41 to temporarily attach a mount plate of a damper and then securing with locking fasteners 44. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use hook-shaped locking

projections with locking fasteners as taught by Hurst et al in the damper mount of Angles et al as it limits the amount of rotation before the locking projections are engaged. This makes it easier to line up the bolt bores since the damper can not be rotated past alignment and thus easier to assembly.

Response to Arguments

5. Applicant's arguments with respect to claims 1-15 have been considered but are moot in view of the new ground(s) of rejection.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert A. Siconolfi whose telephone number is 571-272-7124. The examiner can normally be reached on M-F 10 am-3 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor can be reached on (571) 272-7095. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
